Art Unit: 2891

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, drawn to an apparatus for making a semiconductor device, classified in class 118, subclass 723I.
- II. Claims 21-33, drawn to a method of making a semiconductor device, classified in class 438, subclass 765.
- III. Claims 34-37, drawn to a semiconductor device, classified in class 257, subclass 632.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another and materially different apparatus such as using an apparatus which provides the fluorine based gas by nonselective means.

Inventions II and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process such as using nonselective means to provide the fluorine based gas.

Because these inventions are distinct for the reasons given above and have acquired a separate

status in the art as shown by their different classification, and the search required for the three Groups

are different, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election

of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Chandra Chaudhari whose telephone number is 571-272-1688. The examiner

can normally be reached on Mon - Fri (9:00-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bill

Baumeister can be reached on 571-272-1722. The fax phone number for the organization where this

application or proceeding is assigned is 571-273-8300.
